Centennial on campus

Since it's founding as a small teacher's college with 150 students in 1911 to its evolution as a full-fledged university with 20,000 students, Fresno State has always been an important part of the Central California landscape.

Today's speaker, Dr. John Welty, who is beginning his 20th year as President, will take Rotary members on a trip back in time to learn about the early-day Fresno State and

will bring you back to the present with information about the university today and its Centennial Celebration.

Dr. Welty says, "In our first century, Fresno State has made too many memories to count, but there are never too many memories to celebrate."

He welcomes alumni, friends and the entire community back to the campus for a visit.

Madera Rotarians decorated the Madera Rotary entry in the Old Timer's Parade with Rotary Blue and Gold. A small, but mighty group, **Ren Hallett, Matt Bullis, Stevie Green, Dawn & Grace Power, and "D" Lynn & Will Jones**, came out to participate and show their Rotary Spirit! Old Timer's Day originated in 1931 at the suggestion of Craig Cunningham, a businessman and member of one of the county's pioneer families.
